### Physical Characteristics

|                         |                |
|-------------------------|----------------|
| Area - 94 acres         | Temperatures:  |
|                         | Surface - 79°F |
| Maximum depth - 10 feet | 8 feet - 76°F  |

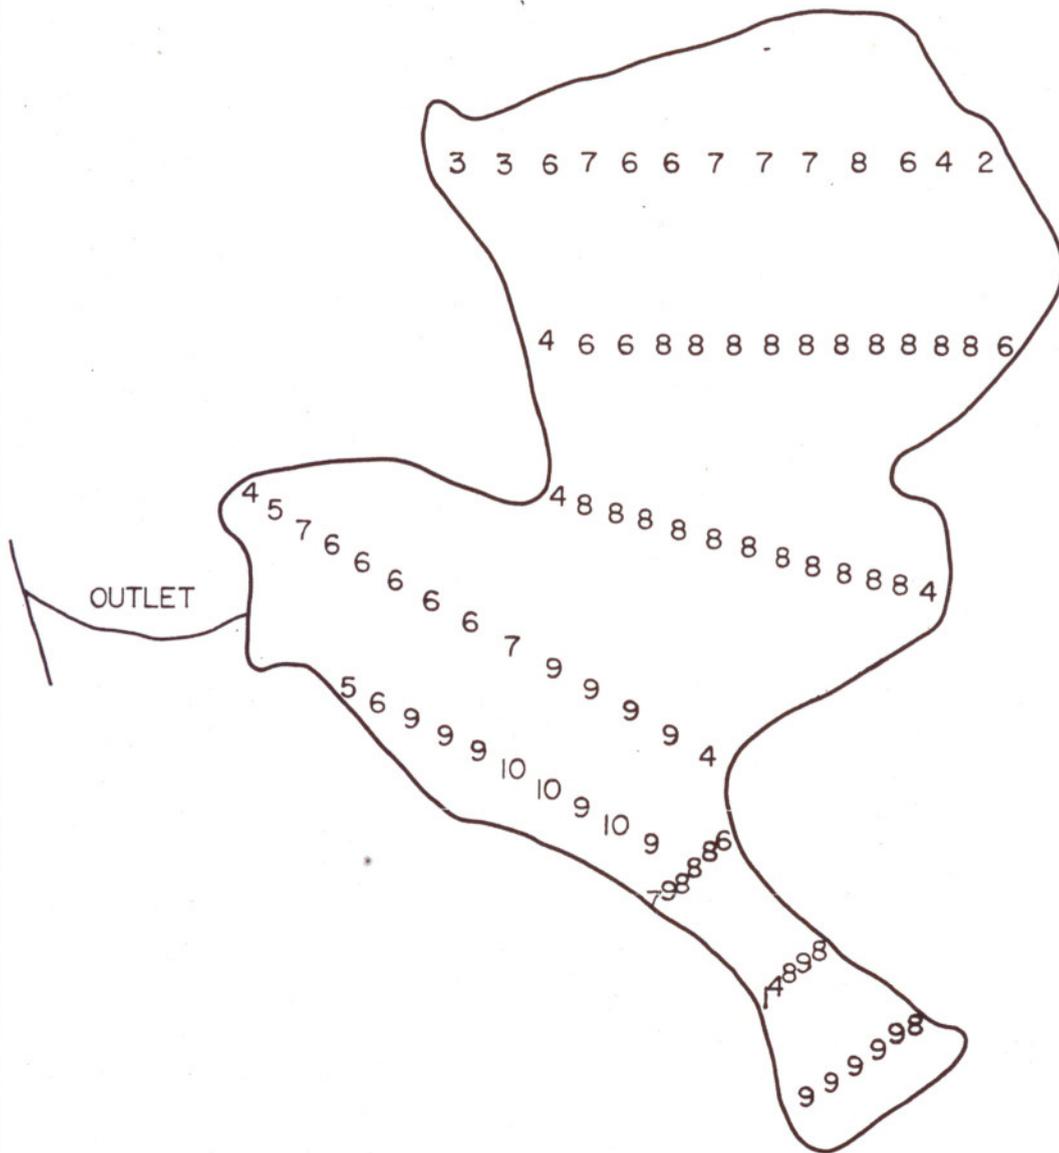

Principal fisheries: Largemouth bass, smallmouth bass, white perch, and chain pickerel

Loon Pond, located west of Mousam Lake, is heavily developed with seasonal camps and year-round residences. This shallow, sandy-bottomed pond provides good habitat for the existing warmwater fish species. The pond is homothermous and lacks cold, oxygenated water for salmonid management.

There is no public boat access, and existing access is via permissive trespass. However, the Town of Acton owns a small strip of land adjacent to the Boy Scout's Camp Nutter, but this access site is quite limited. MDIFW considers public access a high priority and will continue to look for opportunities to create or improve access to Loon Pond.

Surveyed - August 1961
